## Sinar p-slr Professional Tool for 35 mm Photographers

The Sinar p-slr was developed especially for photographers who wish to avail themselves of the unique advantages and quality characteristics of a Sinar view camera while using their digital single lens reflex cameras. Exact control of the perspective and selective sharpness – the most important creative tools in photography – can be set and evaluated precisely on a view camera. All these advantages now have also become available to users of 35 mm cameras. This well thought-out solution is further enhanced by the significant increase in quality provided by the use of high resolution lenses developed by Rodenstock especially for digital photography.

### Professionalism in the details

The Sinar p SLR can be used with all digital single lens reflex cameras that are currently available on the market. Thanks to the quick clamping adapter that is included with the set, the change from vertical to horizontal format can be performed with effortless ease within seconds.

When the single lens reflex camera is connected directly to the camera via USB or FireWire, the integrated strain relief provides safety while working and protection of the USB / FireWire socket on the camera.

A positioning and centering aid serves for the exact positioning of the digital single lens reflex camera on the optical axis. This ensures that the sensor of the digital camera is positioned perfectly in both the vertical as well as the horizontal format setting. This function is indispensable for the unrestricted use of the advantages of the view camera and for working professionally.

## Flexibility and Creativity

Sinar has been the leading manufacturer of view cameras for more than 50 years. Sinar p-slr stands for the highest precision in cameras “Made in Switzerland” and for ergonomics that allow unrestricted creativity. The human hand was used as a guide for the size, shape and handiness of all the operating elements, so that they can be used easily, even in darkened rooms. Locking devices based on practical experience permit a quick and easy changing of lenses and bellows by means of simple finger pressure. Visible design elements give the Sinar p-slr a trendy appearance.

Self-locking drives guarantee highly precise settings – the camera precisely retains the adjusted settings. All the essential elements for creating an image, like swings and tilts of the image- and lens standards (Scheimpflug), as well as vertical and horizontal shifts can be used.

## A View Camera for all Digital Imaging Systems

Whether Canon or Nikon – Sinar offers solutions for all currently available single lens reflex cameras. The change to a digital back is accomplished by means of one of the many available adapters. Thanks to the universal quick clamping adapter, conversions using the various components are very easy and performed within a short time. This Sinar p-slr conforms to the Sinar tradition of offering modular systems to photographers in keeping with the latest trends of the market.

From vertical to horizontal format with a single motion

Sinar p3-slr - Canon Adaption

Sinar p3-slr - Nikon Adaption

Sinar p2-slr - Nikon Adaption

## Benefits that are convincing:

- Unlimited freedom for image creation
- Inserting existing lenses with Copal shutter
- Inserting Hasselblad -V lenses
- Versatile use of an existing single lens reflex camera
- Economical use of existing Sinar View Camera for a digital solution
- Quick change from vertical to horizontal format
- Adapters for most 35 mm camera
- Unique expansion possibility for live image by means of an accessory monitor
- Enhanced quality with the use of medium format and view camera lenses
- Strain relief for USB and power supply cables
- High resolution digital lenses - focal length from 28mm to 210mm
- Versatile assortment of professional accessories such as lens hood and filters

## Technical Data.

Product	Catalog number	Description
Sinar p3-slr-N	491.83.010	SINAR P3 FOR NIKON SLR CAMERAS, WITHOUT LENS AND NIKON CAMERA
Sinar p3-slr-C	491.83.020	SINAR P3 FOR CANON SLR CAMERAS, WITHOUT LENS AND CANON CAMERA
Sinar Conversion Kit p3-slr-N	497.13.010	MOUNTING L-BRACKET, BELLOWS 100 WITH NIKON BAYONET, QUICK CLAMPING ADAPTER, CENTER AID
Sinar Conversion Kit p3-slr-C	497.13.020	MOUNTING L-BRACKET, BELLOWS 100 WITH CANON BAYONET, QUICK CLAMPING ADAPTER, CENTER AID
Sinar Conversion Kit p2-slr-N	497.13.030	MOUNTING L-BRACKET, BELLOWS 4x5 WITH NIKON BAYONET, QUICK CLAMPING ADAPTER, CENTER AID
Sinar Conversion Kit p2-slr-C	497.13.040	MOUNTING L-BRACKET, BELLOWS 4x5 WITH CANON BAYONET, QUICK CLAMPING ADAPTER, CENTER AID
